

CAB-LOK

Prevent injuries and fatalities while servicing cab over engine (COE) trucks with CAB-LOK.

The unique design of CAB-LOK quickly and easily secures the cab during maintenance, allowing workers to safely access the engine area.

A single CAB-LOK can be used to secure the cab, while the adjustable height adapts to various vehicles.

Constructed of aluminum for lightweight strength. Attached ratcheting strap secures the CAB-LOK to the truck frame.
