

DUMP-LOK

Every year, serious injuries and fatalities occur in the workplace when unsecured dump beds fall on workers that are making repairs between the bed and frame. DUMP-LOK is a unique and simple solution that safely secures the dump bed, preventing injuries.

OSHA has issued a safety and health information bulletin to alert employers and workers about the hazards of falling dump truck beds. For example, a worker replacing the rear stabilizer bar on a tandem dump truck and was crushed when the hydraulic cylinder of the OE brace failed. An employee greasing the U-Joints of a 1970 dump truck ultimately died from injuries sustained when the wood planks propping up the dump bed were dislodged. These types of tragedies can be prevented by safely securing the bed with DUMP-LOK during service and repairs.
